

Climate Hub

The Climate HUB SZT series product is the worlds most advanced plug & play climate control system. With the ability to have upto 12 Zones per system, Climate HUB SZT is the marquee product in the HUB climate range and incorporates the Home HUB smart device gateway. The Home HUB gateway streams information to other Home HUB devices and to your computer, Ipad, android or iPhone. Other Home HUB features such as mothership, sightglass and cloud cover are also part of the SZT series product platform.

FEATURES

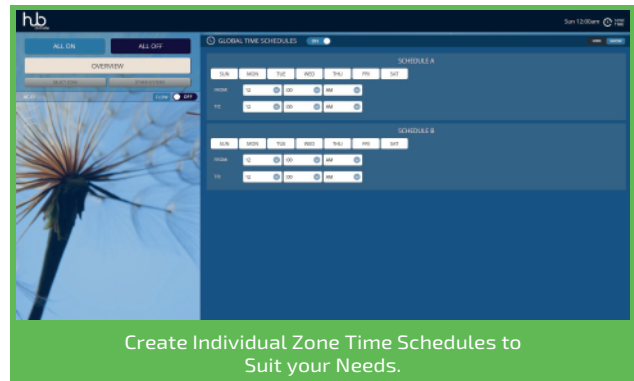

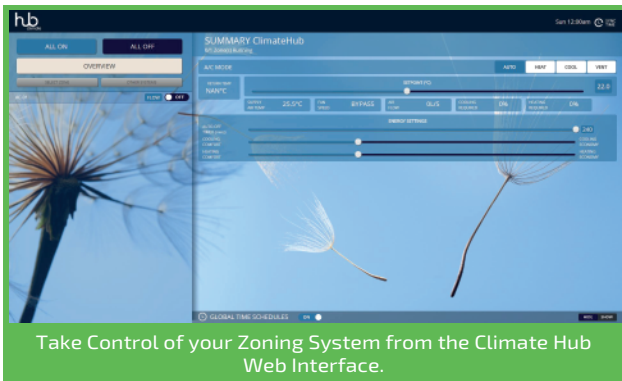

-  Smart Device Connectivity
-  Adjustable Room Airflow
-  Capacitive Touch Touchpads
-  Radical Flow Duct System Compatible
-  Temperature Setpoint in every room
-  Variable indoor Air Flow Compatible
-  Dynamic Energy Recovery
-  Variable Refrigeration Flow Compatible
-  Automation Ready

Climate Hub

Technical Specifications			Climate Hub
Power Supply	Operating Voltage	Voltage	24V AC ± 10%
		Frequency	50/60 Hz
		Power Consumption	Max 5VA
		Electrical Connection	Terminal connectors, 0.34 to 2.5mm ² wire
Communication	Base	Interface	WiFi, Ethernet, DHCP, Modbus, RS-485
		Control	Modbus
General		Safety Class	II (IEC 60536)
		Degree of Protection	IP20 to EN 60529
		Material	PC + ABS Plastic (UL94 class V-0)
		Dimensions	57 x 147 x 115 mm
